Keystone Solutions Group Gears up for Minneapolis Expo

KALAMAZOO, MI – Keystone Solutions Group will participate in Medical Design & Manufacturing (MD&M) Minneapolis as part of the MiDevice consortium and The Right Place. The show is set for Nov. 8-9, 2017, at the Minneapolis Convention Center.

Keystone Solutions Group (Keystone) is a West Michigan-based engineering, product development, and medical device manufacturing company. In the medical device world, Keystone provides complete and scalable solutions from development through manufacturing.

From contract assembly to distribution, Keystone works with its clients to make the medical device product development cycle as smooth as possible. It offers solutions for development, manufacturing, warehousing, and distribution of a variety of products including wound care, imaging, patient surfaces, and therapeutic devices.

“We are excited to participate in MD&M Minneapolis,” said Jim Medsker, President of Keystone Solutions Group.

“Our relationship with MiDevice and The Right Place has made it possible for us to attend the show and have an exhibit that is top notch for about 10 years. By being co-located with other MiDevice members, we also benefit from increased networking amongst ourselves and with potential clients,” Medsker said.

Keystone Solutions Group has been a part of MiDevice for 12 years. MiDevice is the only Michigan-based organization dedicated to medical device design, development, manufacturing, and distribution.

The Right Place is a private, non-profit economic development organization with a mission to drive economic prosperity in West Michigan through leading business retention, expansion, and attraction efforts.

Keystone Solutions Group is looking forward to meeting with individuals and organizations in need of product development expertise and guidance.

“A key focus of the show is to create a venue for people and companies looking for resources in the medical design and manufacturing areas,” Medsker said. “Keystone provides both design and manufacturing services, so we cover the ‘D’ and the ‘M’ in MD&M.”

For more information about Keystone Solutions Group and the Medical Design & Manufacturing Minneapolis event, please contact Jim Medsker by phone calling 269-978-3420, emailing jim.medsker@keystone-pd.com, or visiting Keystone at the event in booth 1423.
